Sustainable Sporting Infrastructure – Sussex Inlet NSW –Community Partnership

Sustainable Communities national strategy team has a policy of support for the creation of best practice sustainable infrastructure and we can now confirm partnership arrangements with the Sussex Inlet & Districts Skate and BMX Club for project 7767.

The resultant positive environmental positive outcomes generated by these community partnerships and projects are extremely important to the general well being of the population and the project will provide access to world first sustainable Skate and BMX community sporting infrastructure.

Sustainable Communities unconditionally supports this project. The Sussex Inlet and Districts Skate and BMX Club is well respected part of the community and the proposed new sporting infrastructure will substantially improve the present inadequate infrastructure and create numerous green jobs in a socially disadvantaged region with high unemployment.

We understand that Shoalhaven City Council approval has been given to build this “shovel ready” sustainable infrastructure and create a state of the art, environmental sustainable community sporting facility.

Yours sincerely
